Professional Summary

Cybersecurity and information systems security specialist in training, with strong expertise in ISO 27001 audits, risk assessment, and full-stack development (Java, Angular, Spring Boot). Demonstrated ability to deliver secure, efficient solutions while collaborating with cross-functional teams and communicating technical concepts to non-technical audiences.

Education

Higher Institute of Management (ISG) <i>Master's in Information Systems Security</i>	Tunis, Tunisia <i>2024 – Present</i>
Higher School of Digital Economy (ESEN) <i>Bachelor's in Management Information Systems</i>	Tunis, Tunisia <i>2021 – 2024</i>
– Graduated with High Honors	

Work Experience

ANCS Tunisia <i>Intern – Internal Audit Platform Developer</i>	Tunis, Tunisia <i>Jun 2025 – Jul 2025</i>
– Reduced manual audit processes by 40% through a full-stack platform using Angular and Spring Boot .	
– Implemented JWT authentication and RBAC to safeguard sensitive audit data, ensuring ISO 27001-compliant logging.	
– Produced 3+ UML diagrams (use case, sequence, class) to document and optimize audit workflows.	
HRS Tunisia <i>Web Developer – Final Year Project</i>	Tunis, Tunisia <i>Feb 2024 – May 2024</i>
– Aggregated exchange rates from 10+ banks , updating values every 60 seconds for accuracy.	
– Developed a currency conversion module with sub-200ms response time via optimized REST API calls.	
– Implemented responsive front-end UI using Bootstrap for multi-device compatibility.	

Projects

Internal Security Audit Report – TechConsult S.A.	
– Simulated an ISO/IEC 27001:2022 internal audit across 7 security domains , including access control, network security, asset management, and incident response.	
– Identified 4 medium-risk gaps and recommended actionable improvements such as MFA enforcement, phishing awareness campaigns, and monthly backup testing.	
– Produced a compliance checklist, risk summary, and final report for portfolio demonstration.	
Third-Party Risk Assessment – Zoom Video Communications Inc.	
– Performed a simulated security risk assessment of Zoom against ISO 27001 , SOC 2, and GDPR controls.	
– Evaluated 10 key security controls , achieving a score of 9.5/10 and identifying residual risk from past incidents.	
– Documented findings, mitigation recommendations, and security posture evaluation in a professional report.	
FIFA Club World Cup 2025 Web Application	
– Developed a full-stack web app (Angular + Spring Boot) managing 50+ players across 32 teams , with a normalized SQL database and responsive multi-device interface.	

Technical Skills

- **Programming:** Java, Angular, Spring Boot, PostgreSQL, .NET, Python
- **Cybersecurity Tools:** Kali Linux, Metasploit, Nmap, Burp Suite, Wireshark
- **Audit & GRC:** ISO 27001, Internal Audits, Risk Analysis, Logging, GRC Platforms

Certifications

- **ISO/IEC 27001:2022 Lead Auditor** – Mastermind Assurance (2025)
