SUMMARY

Cybersecurity master's student with hands-on experience in internal auditing, ISO 27001 compliance, secure web development, and penetration testing. Proven ability to manage technical audits, develop GRC solutions, and strengthen application security. Eager to apply skills in security governance and technical controls in a professional role.

SKILLS

- **Programming & Web Dev:** Java, Angular, Spring Boot, PostgreSQL, .NET, Python
- **Cybersecurity Tools:** Kali Linux, Metasploit, Nmap, Burp Suite, Wireshark
- **Audit & GRC:** ISO 27001, Internal Audit, Risk Assessment, Audit Logs, GRC Platforms
- **Soft Skills:** Problem Solving, Analytical Thinking, Communication, Accountability

EDUCATION

- **Higher Institute of Management (ISG)** Tunis, Tunisia
Master's in Information Systems Security 2024 – Present
- **Higher School of Digital Economy (ESEN)** Tunis, Tunisia
Bachelor's in Management Information Systems 2021 – 2024
 - **Honors:** Graduated with High Distinction
- **Rue de Russie High School** Tunis, Tunisia
Baccalaureate in Computer Science 2020 – 2021
 - **Mention:** Fair

EXPERIENCE

- **ANCS Tunisia** Tunis, Tunisia
Intern – Security Audit Platform Developer Jun 2025 – Jul 2025
 - **Audit Platform Development:** Developed a complete internal audit web platform (Angular + Spring Boot) that reduced manual auditing tasks by 40%.
 - **Process Modeling:** Designed UML diagrams (use case, sequence, class) to support the audit lifecycle: planning, execution, reporting.
 - **Security Compliance:** Integrated secure authentication (JWT), audit logging, and RBAC aligned with ISO 27001 controls.
- **HRS Tunisia** Tunis, Tunisia
Web Developer – Final Year Project Feb 2024 – Apr 2024
 - **Real-Time Currency Exchange Platform:** Built X-CHANGE to aggregate and display real-time exchange rates from 10+ banks in Tunisia.
 - **Currency Conversion Tool:** Implemented a dynamic calculator with REST API integration.

PROJECTS

- **Netspace Pentest Lab:** Performed end-to-end pentest on simulated vulnerable VMs: used Nmap, enumerated services, exploited reverse shells, escalated via SUID misconfig.
- **HealthUnity:** Developed a secure full-stack (HTML + PHP) app for managing doctor appointments and medical store with dashboards and RBAC.
- **FIFA Club World Cup 2025:** Built an interactive Angular + Spring Boot app to track teams and players with stats visualization and normalized relational database structure.

CERTIFICATIONS

- ISO/IEC 27001:2022 Lead Auditor – Mastermind Assurance (2025)

INTERESTS

- Open Source Tools, Football, Gaming
